Worksheet 3 (C.W.)

Pg 103 - D

Answer the given questions.

1. What is a full moon night?

Ans 1. When the moon is round like a ball , we call it a full moon night.

2. From which direction does the sun appear to rise and in which direction it appear to set?

Ans 2. The sun appears to rise in the east and set in the west.

3. Write two lines on each.

- i) The Sun – The sun is a big ball of fire. It gives us heat and light.
- ii) The Moon – The moon is smaller in size than the sun. It appears to change it's shape.
- iii) The Stars – Stars are many in number. They twinkle at night.
